

weBoat 4G™

THE NEW 3G / 4G AND WI-FI COASTAL INTERNET ANTENNA SYSTEM

Use your iPhone® and Smartphone at sea, at approximately 10 miles from the coast!

Insert the SIM Card on the receptacle outside the antenna and get a 3G/4G signal or Wi-Fi connection (if present), providing internet for each web device that you have on board (Smartphones, tablet, Iphone, Ipad, PC,..)

Main Features:

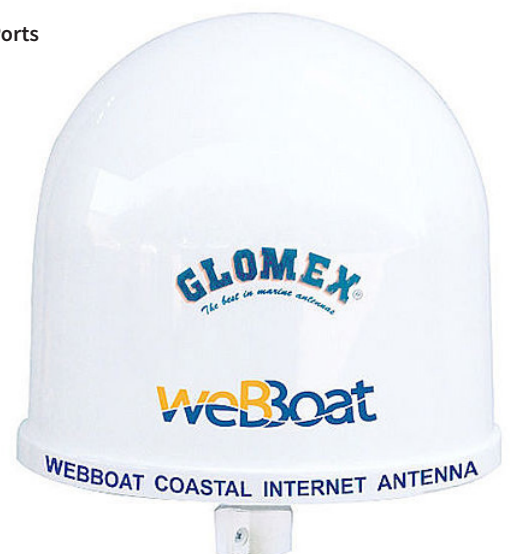

- Automatic switch from 3G/4G to Wi-Fi on registered networks to limit 3G/4G fees
- Multi-user devices access - up to 32 user devices
- LTE up to 100 Mbps in download and 50 Mbps in upload (the connection speed depends on your SIM data plan and on the distance of the internet transmitter) (IT1004 version)
- DC - HSPA+ up to 42 Mbps in download and 5.76 Mbps in upload (IT1004 version)
- HSPA+ up to 21 Mbps in download and 5.76 Mbps in upload (IT1003 version)
- Quadband UMTS, GSM, 3G and 4G/LTE
- External receptacle for 1 SIM Card (pic 1)
- 2 Diversity high gain antennas
- 3G/4G backup WAN function
- SMS reboot function
- 10/30 Vdc Power supply

4 Ethernet Ports
